

Friday Report – overview and contents

The pages in The Friday Report are about adult offenders in Georgia's prisons and jails. They contain statistical snapshots and trends in the populations and movements of offenders in the state prison system, on probation, on parole, and in local jails. Information comes from databases of the Georgia Department of Corrections (GDC) and the Board of Pardons and Paroles, and from data provided by local jailers. Information is summarized into tables in the GDC/Parole Data Warehouse, and is extracted into these pages each Friday. Pages are organized according to the table that supplied the data.

The Monthly Research Table, named "MO_RESRCH" or simply "MO", contains data about state prisoners, grouped into statistically interesting categories. The table contains one record per month, from January 2000 to the present. Despite its being "monthly", it is updated weekly, because some data trickles in for several weeks before it becomes stable history.

Friday Report – overview and contents (*continued*)

The MSR Table is based on the Management Summary Report (MSR), a snapshot report posted each week in GDC's Scribe database. MSR_RESRCH gathers that data into weekly trends, with one record for each Friday since March 20th, 2009.

MSR-01	All housed offenders. Weekly graph from March 20, 2009 to present, showing counts of inmates in state prisons, transitional centers, county prisons, private prisons, inmate boot camps, parole revocation centers, probation Residential Substance Abuse Treatment (RSAT), probation boot camps, probation detention centers, plus the inmate jail backlog and probationers in jail waiting for state facilities.
MSR-02	Probationers in jail. Weekly graph from March 20, 2009 to present, showing counts of probationers in local jails awaiting placement in probation detention centers, probation RSAT centers, and probation boot camps.
MSR-03	State inmates in jail. Weekly graph from March 20, 2009 to present, showing counts of state inmates in local jails awaiting placement in state prison facilities – including those who have not yet been assigned to a diagnostic center, those whose transportation has been delayed for some reason, and those who are ready to be picked up.

MSR-05	52-week table: housed offenders. Data for each of the past 52 weeks, showing total prison inmates, parolees in revocation centers, probationers in RSAT/boot camp/detention centers, inmate jail backlog, probationers in jail waiting for facilities, with subtotals.
MSR-06	52-week table: state prisoners. Data for each of the past 52 weeks, showing inmates in state prisons, transition centers, county prisons, pre-release centers, private prisons, and inmate boot camps, with subtotals.
MSR-07	52-week table: waiting in jail. Data for each of the past 52 weeks, showing probationers waiting for detention centers, RSAT, and boot camp; and state prisoners not yet assigned to diagnostic centers, in admission process, with delayed transport, and ready for pickup, with subtotals.

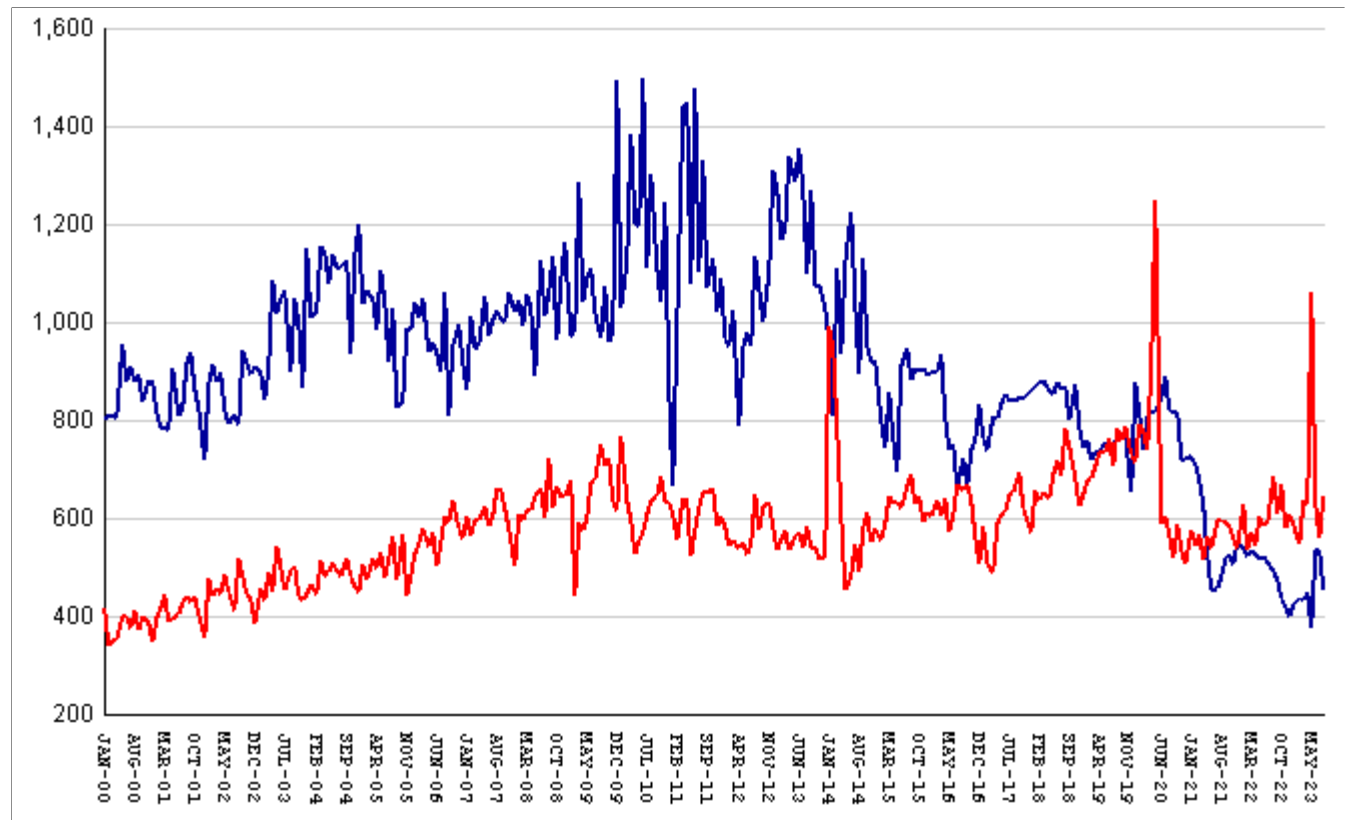

The DCA table consists mainly of data submitted from each of Georgia's 140+ local jails, via the Georgia Crime Information Center (GCIC) to the Georgia Department of Community Affairs (DCA), which publishes its [County Jail Inmate Population Report](#) on its web site each month. GDC has collected summary statewide data from this report every month since its inception in January, 1993. The table also contains the inmate jail backlog as computed by GDC for the last Friday of each month, for comparison with the jailers' count of state inmates. Although nominally a monthly table, DCA_RESRCH is updated weekly to insure that the DCA data is correctly synchronized with the GDC jail backlog data.

DCA-01	Jail composition. Monthly graph from 1993 to the present shows trends in the numbers of unsentenced inmates, state inmates, county inmates, and other inmates.
DCA-02	Two views of jail backlog. Monthly graph from 1993 to present compares jailers' count of "state inmates" with GDC's count of the "inmate jail backlog", and explains that both are valid counts of different phenomena.

Releases by clemency and maxout, Jan-2000 to Aug-2023

There are two main ways of being released from a Georgia prison -- by actions of the Board of Pardons and Paroles ("Clemencies") and by service of 100% of the court-ordered sentences ("Maxouts"). "Clemency" includes paroles, reprieves, commutations, and transfer to other confinement prior to expiration of sentence.

"Other Releases" includes deaths, and sentences modified or overturned by the courts. Clemencies and maxouts may or may not be followed by periods of probation.

Inmates with meth crimes, by month, Jan-2000 to Aug-2023

Methamphetamine is one of the most addictive drugs ever known. At first it induces intense euphoria, but with continued use causes severe depression and physical deterioration, including the dental catastrophe known as "meth mouth".

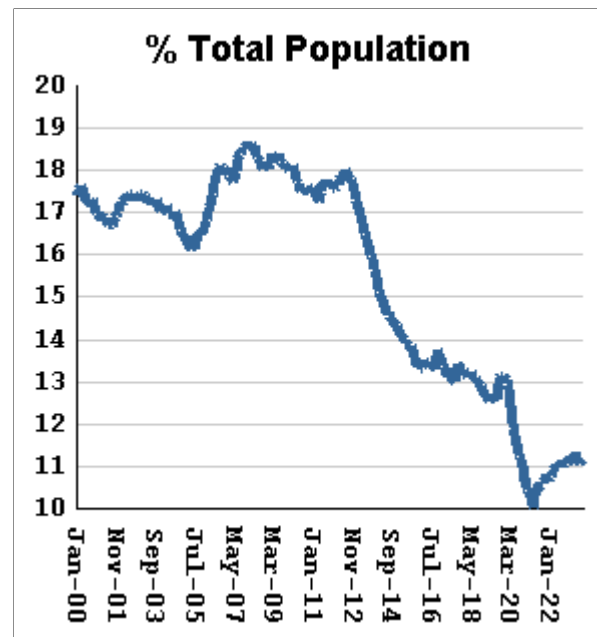

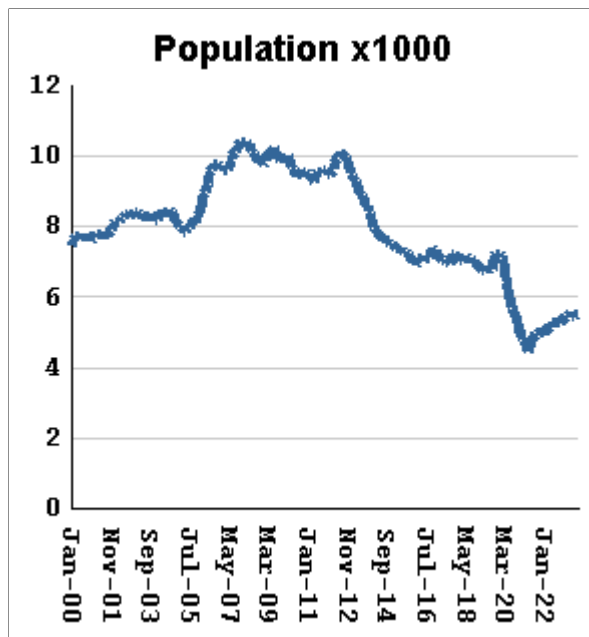

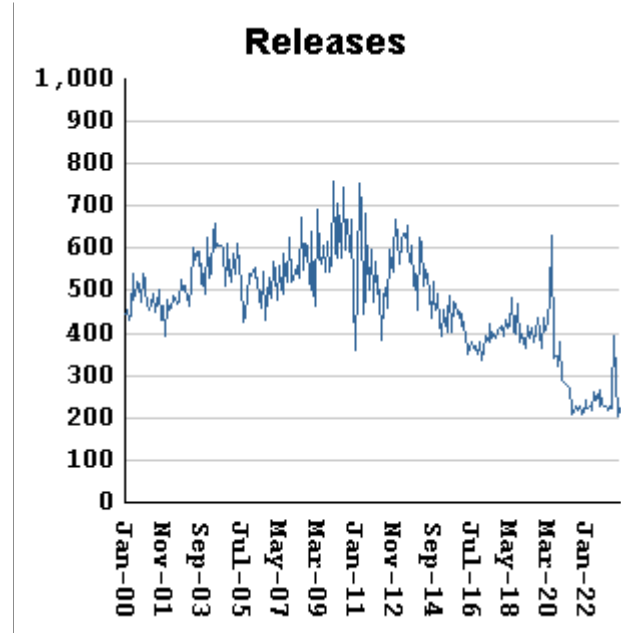

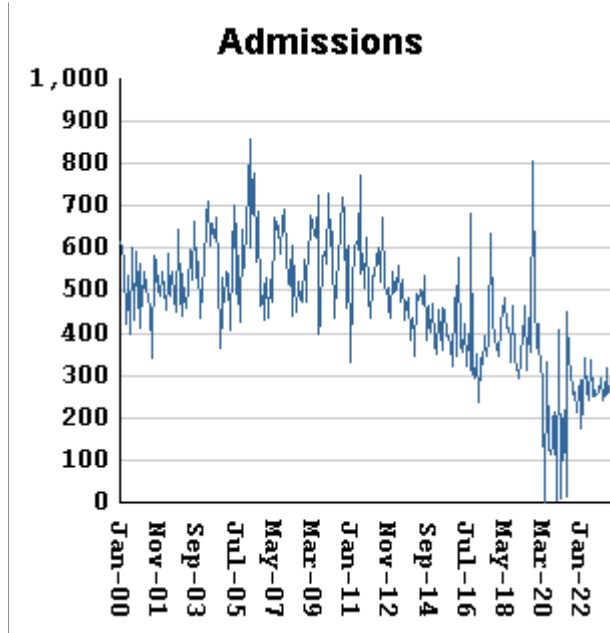

Georgia's meth epidemic peaked in 2007-2008, then declined, but is again growing. It started in the predominantly white northern counties, with blacks accounting for only about 5% of convictions. But black usage has expanded, and now accounts for about 15% of convictions.

Methamphetamine admissions	fall by	40	from	320	to	280
Methamphetamine releases	RISE BY	9	from	262	to	271

Meth white population	falls by	35	from	5297	to	5262

Percent meth inmates who are non-white	RISES BY	.07 %	from	28.13%	to	28.2%

Non-violent first-incarcerants, by month, Jan-2000 to Aug-2023

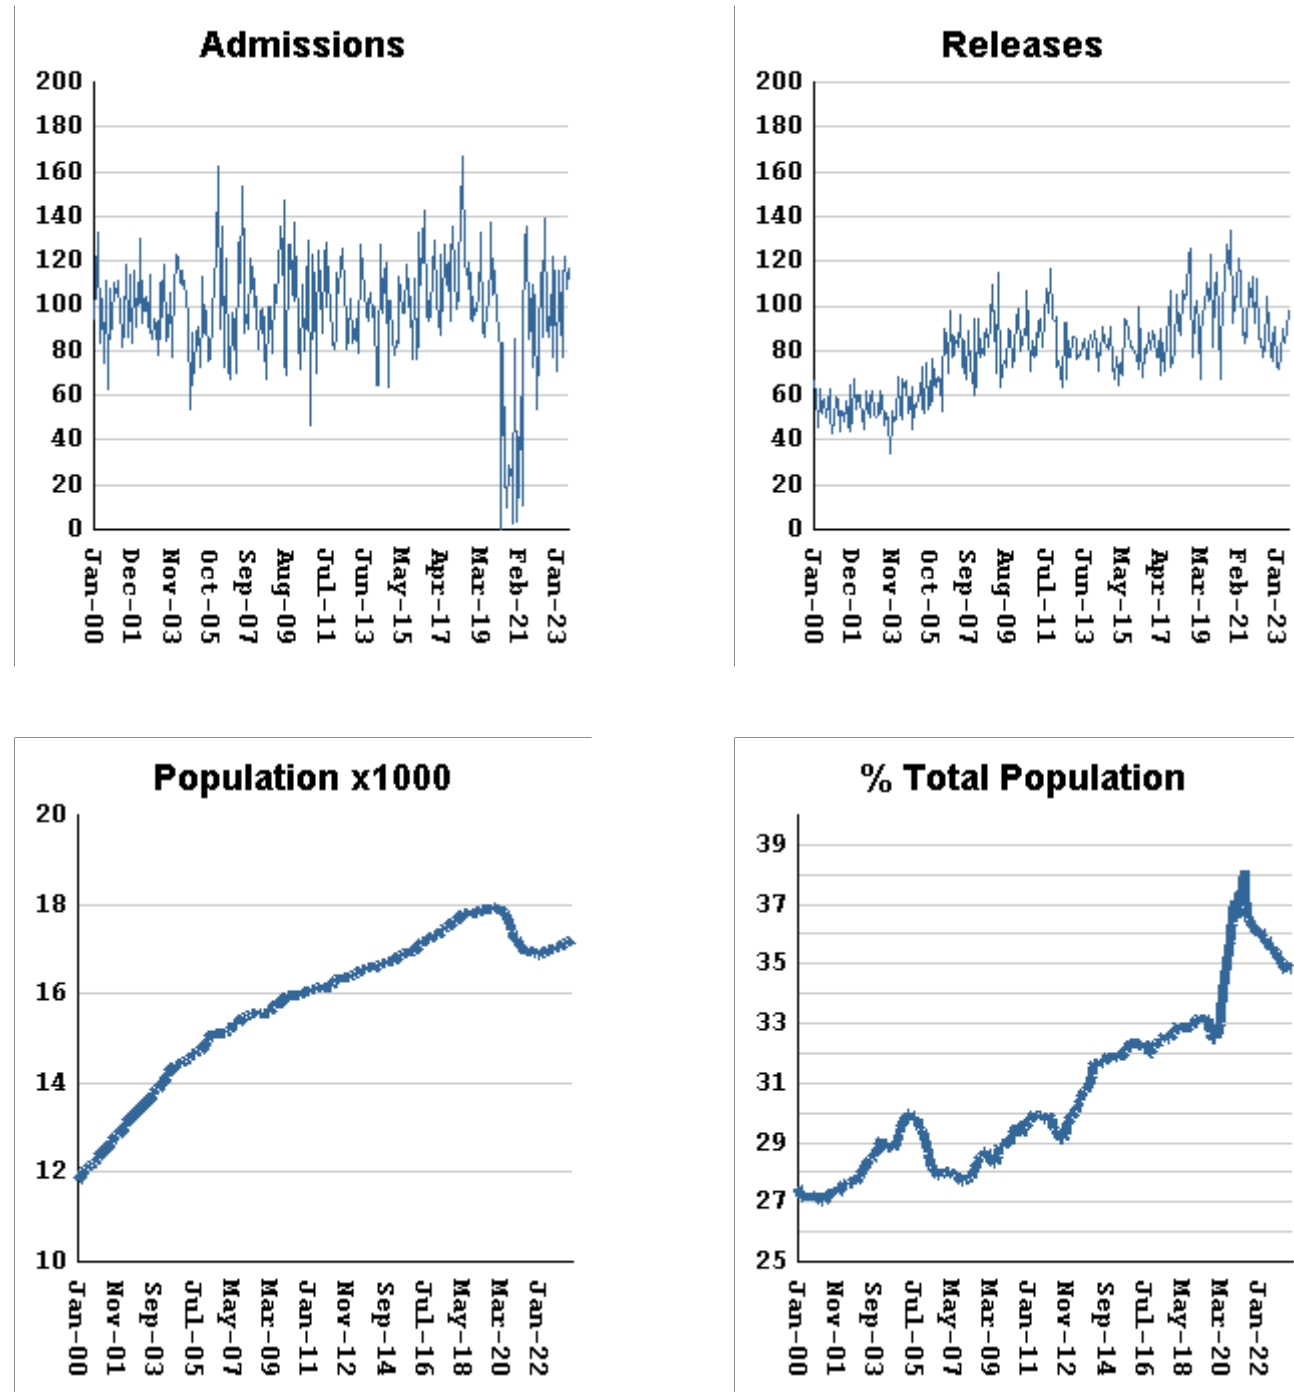

Historically, about one in six Georgia prison inmates has been a first-time incarcerant with a non-violent crime. In 2012 Georgia passed HB1176, which aimed to curb the growth of prison population by steering the least dangerous, least hardened offenders away from prison through pre-trial intervention, diversion, drug courts and treatment programs, and raising the dollar thresholds that define property felonies. The expectation is that over time, these measures will reduce the percentage of first-time non-violent incarcerants in prison.

Non-viol/1st-Incar admissions	fall by	4	from	259	to	255
Non-viol/1st-Incar releases	RISE BY	21	from	204	to	225
Non-viol/1st-Incar population	RISES BY	30	from	5494	to	5524

"Seven Deadly Sins" by month, Jan-2000 to Aug-2023

Tough legislation in 1995 imposed mandatory ten-year minimum terms for kidnapping, armed robbery, rape, aggravated sodomy, aggravated sexual battery, and aggravated child molestation, and a minimum of 25 years for murder. A second conviction resulted in life without parole. As predicted, longer prison terms caused population to climb steeply for about a decade. It then began to level off, as releases started catching up with admissions. The 2008 dip in percentage of total population (bottom right) was caused by the surge of methamphetamine convictions (Page MO-03). Note: these graphs include inmates convicted before 1995.

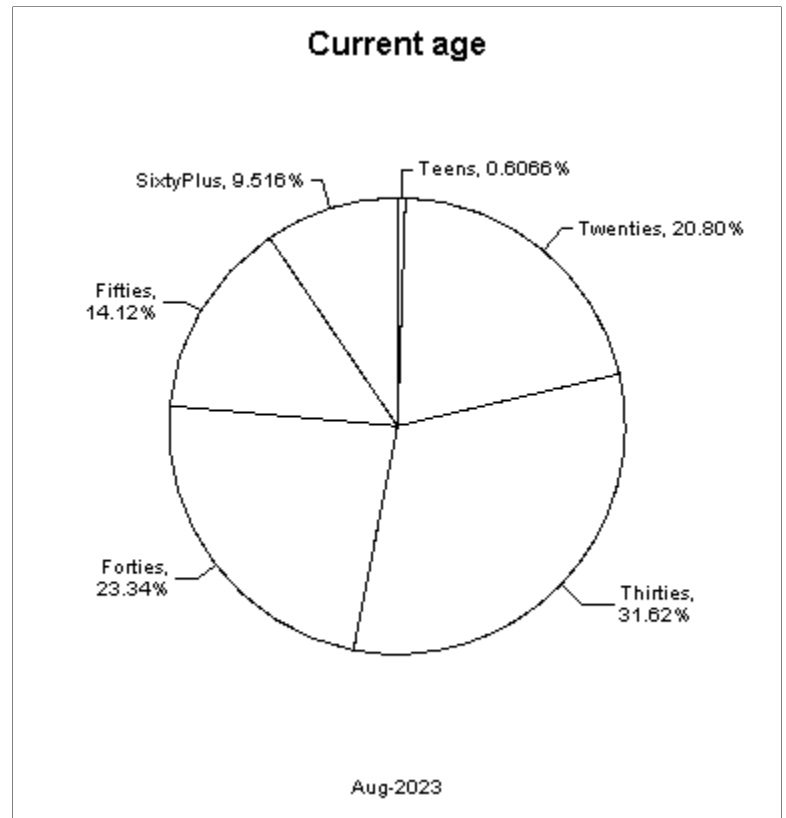

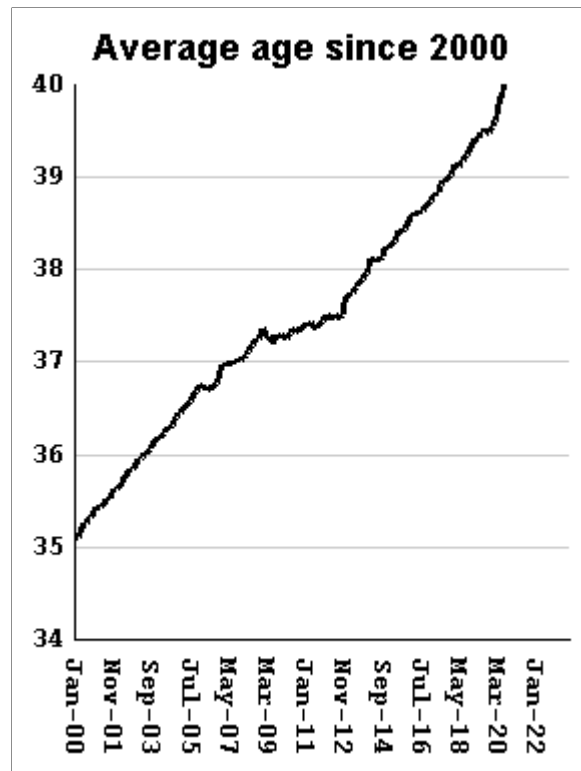

"Seven Deadly Sin" admissions	RISE BY	9	from	108	to	117
"Seven Deadly Sin" releases	RISE BY	8	from	90	to	98
"Seven Deadly Sin" population	RISES BY	19	from	17187	to	17206

Overview of inmate age statistics, Jan-2000 to Aug-2023

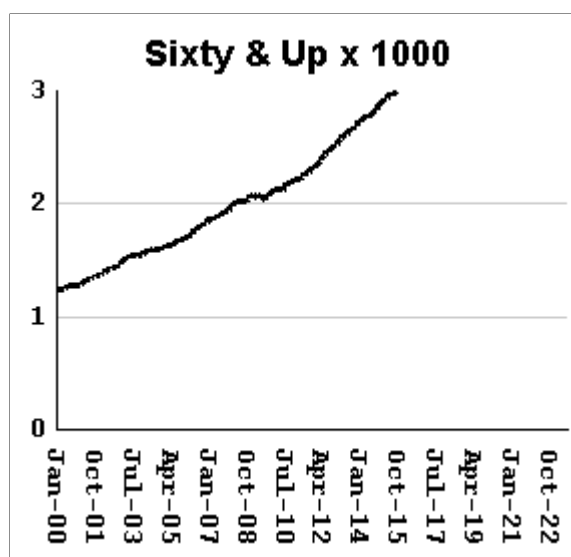

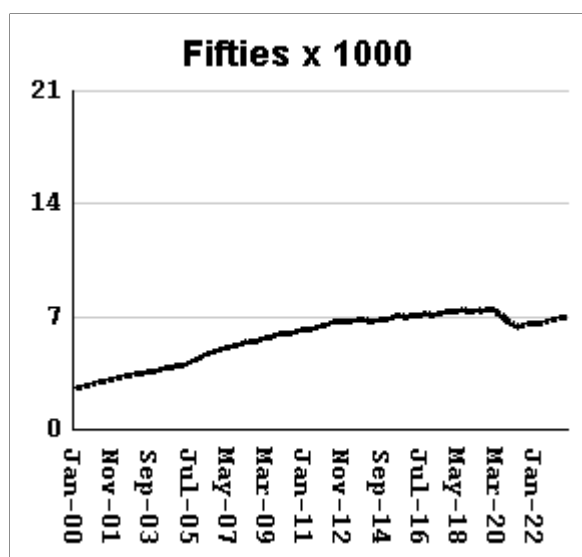

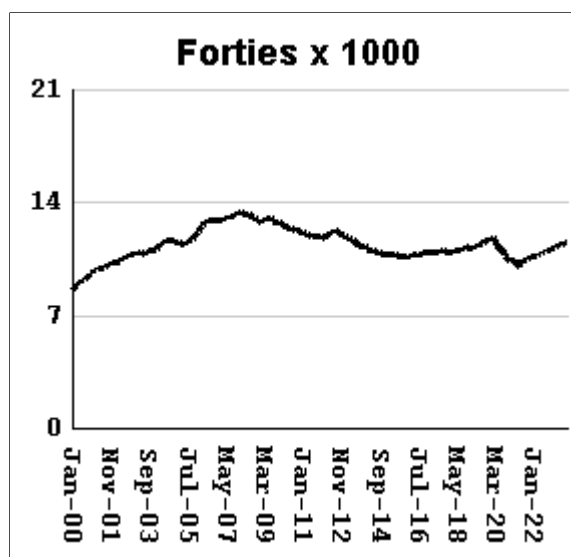

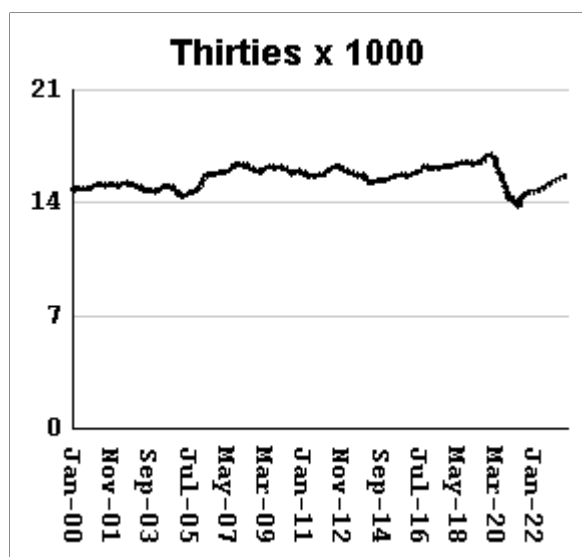

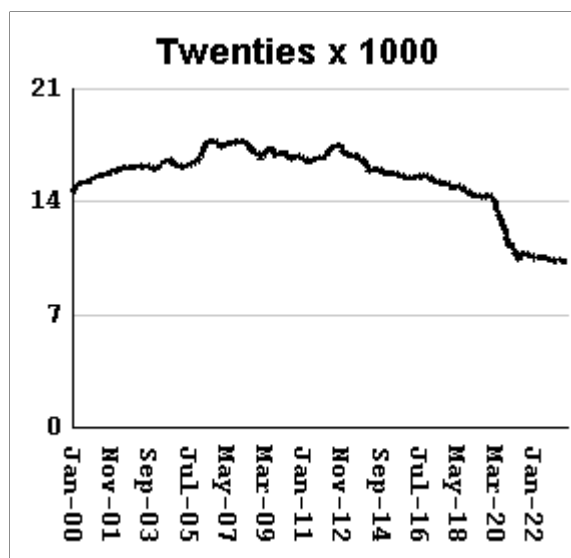

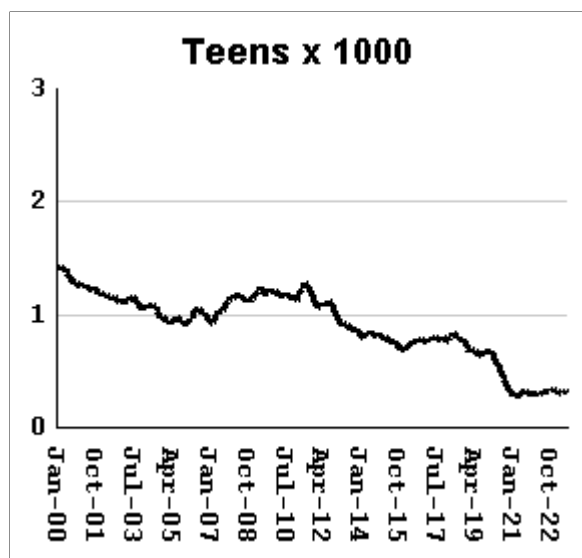

The "aging inmate population" is a concern in correctional systems throughout America, including Georgia. Here, the increase in inmate age is the result of several factors. Teenagers have been steered away from prison by increased usage of probation and other alternatives, at least for their first convictions. And there has been a surge of middle-aged male sex offenders due to the expanding "It's OK to tell" ethos. But most importantly, more severe sentence lengths and release policies have greatly increased the length of time that most offenders -- especially violent ones -- spend in prison, thereby increasing their average age.
