

Friday Report – overview and contents

The pages in The Friday Report are about adult offenders in Georgia's prisons and jails. They contain statistical snapshots and trends in the populations and movements of offenders in the state prison system, on probation, on parole, and in local jails. Information comes from databases of the Georgia Department of Corrections (GDC) and the Board of Pardons and Paroles, and from data provided by local jailers. Information is summarized into tables in the GDC/Parole Data Warehouse, and is extracted into these pages each Friday. Pages are organized according to the table that supplied the data.

The Monthly Research Table, named "MO_RESRCH" or simply "MO", contains data about state prisoners, grouped into statistically interesting categories. The table contains one record per month, from January 2000 to the present. Despite its being "monthly", it is updated weekly, because some data trickles in for several weeks before it becomes stable history.

Friday Report – overview and contents (*continued*)

The MSR Table is based on the Management Summary Report (MSR), a snapshot report posted each week in GDC's Scribe database. MSR_RESRCH gathers that data into weekly trends, with one record for each Friday since March 20th, 2009.

MSR-01	All housed offenders. Weekly graph from March 20, 2009 to present, showing counts of inmates in state prisons, transitional centers, county prisons, private prisons, inmate boot camps, parole revocation centers, probation Residential Substance Abuse Treatment (RSAT), probation boot camps, probation detention centers, plus the inmate jail backlog and probationers in jail waiting for state facilities.
MSR-02	Probationers in jail. Weekly graph from March 20, 2009 to present, showing counts of probationers in local jails awaiting placement in probation detention centers, probation RSAT centers, and probation boot camps.
MSR-03	State inmates in jail. Weekly graph from March 20, 2009 to present, showing counts of state inmates in local jails awaiting placement in state prison facilities – including those who have not yet been assigned to a diagnostic center, those whose transportation has been delayed for some reason, and those who are ready to be picked up.

MSR-06	52-week table: state prisoners. Data for each of the past 52 weeks, showing inmates in state prisons, transition centers, county prisons, pre-release centers, private prisons, and inmate boot camps, with subtotals.
MSR-07	52-week table: waiting in jail. Data for each of the past 52 weeks, showing probationers waiting for detention centers, RSAT, and boot camp; and state prisoners not yet assigned to diagnostic centers, in admission process, with delayed transport, and ready for pickup, with subtotals.

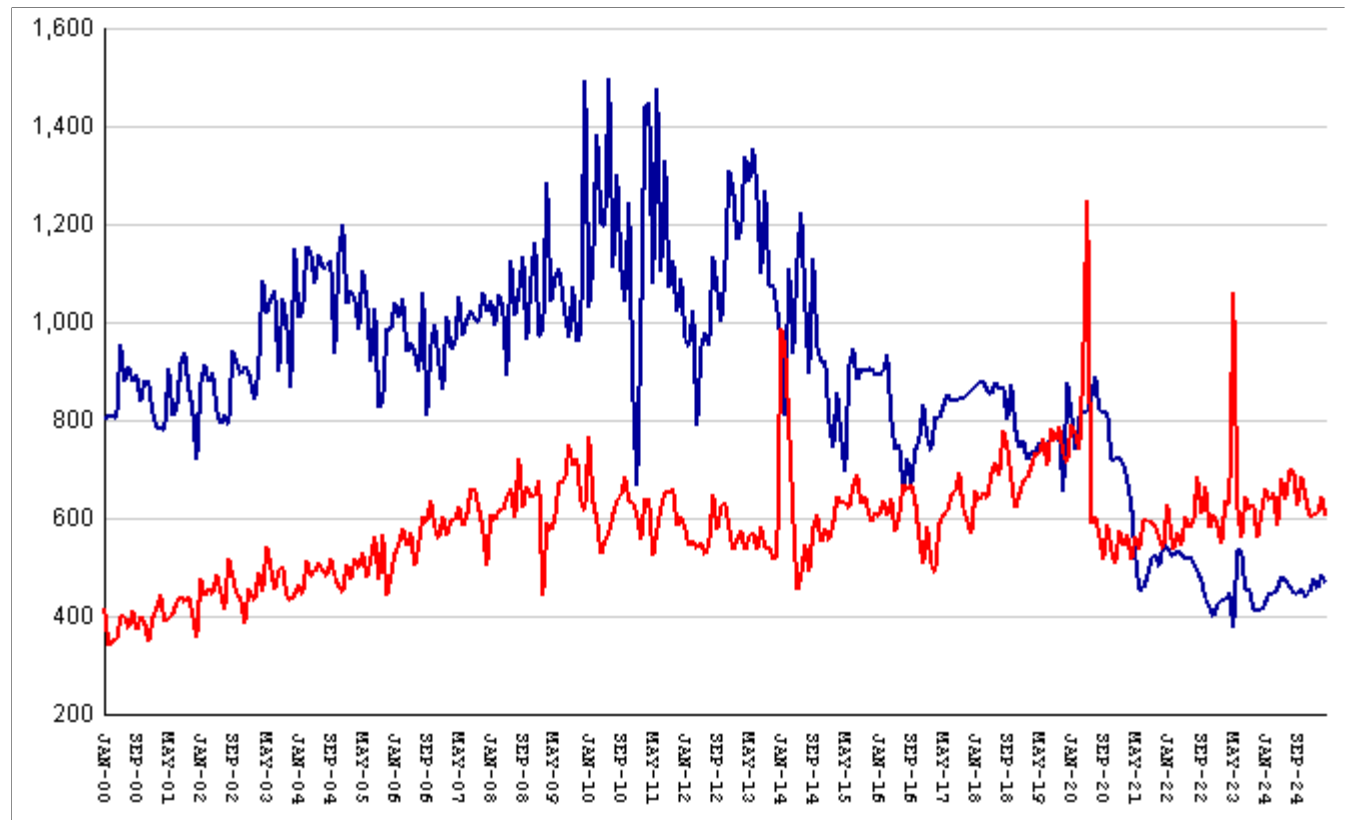

The DCA table consists mainly of data submitted from each of Georgia's 140+ local jails, via the Georgia Crime Information Center (GCIC) to the Georgia Department of Community Affairs (DCA), which publishes its [County Jail Inmate Population Report](#) on its web site each month. GDC has collected summary statewide data from this report every month since its inception in January, 1993. The table also contains the inmate jail backlog as computed by GDC for the last Friday of each month, for comparison with the jailers' count of state inmates. Although nominally a monthly table, DCA_RESRCH is updated weekly to insure that the DCA data is correctly synchronized with the GDC jail backlog data.

Releases by clemency and maxout, Jan-2000 to Apr-2025

There are two main ways of being released from a Georgia prison -- by actions of the Board of Pardons and Paroles ("Clemencies") and by service of 100% of the court-ordered sentences ("Maxouts"). "Clemency" includes paroles, reprieves, commutations, and transfer to other confinement prior to expiration of sentence.

"Other Releases" includes deaths, and sentences modified or overturned by the courts. Clemencies and maxouts may or may not be followed by periods of probation.

Inmates with meth crimes, by month, Jan-2000 to Apr-2025

Methamphetamine is one of the most addictive drugs ever known. At first it induces intense euphoria, but with continued use causes severe depression and physical deterioration, including the dental catastrophe known as "meth mouth".

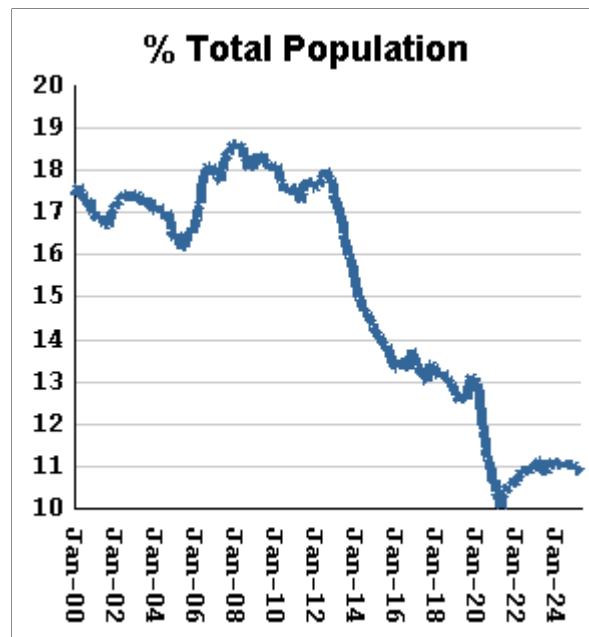

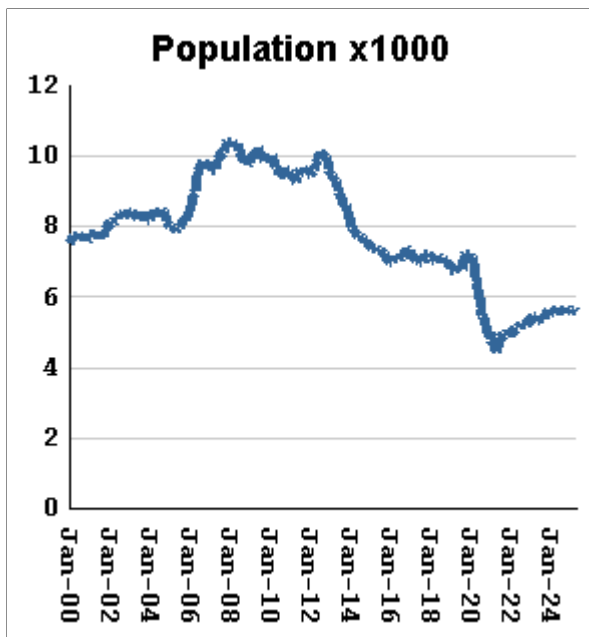

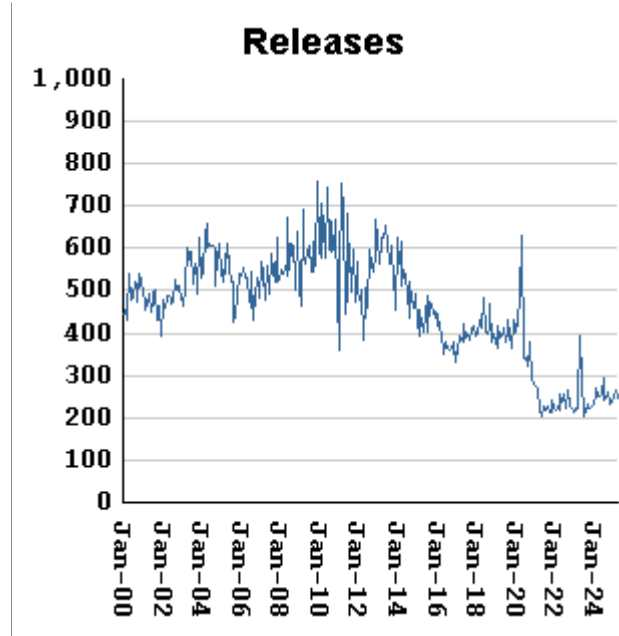

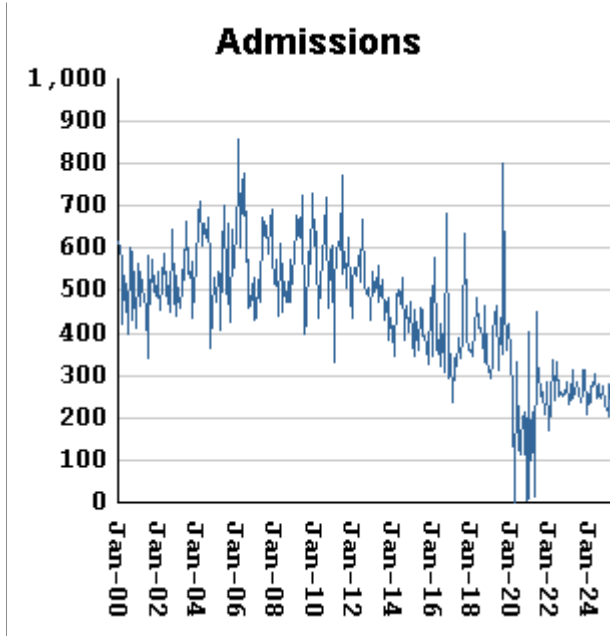

Georgia's meth epidemic peaked in 2007-2008, then declined, but is again growing. It started in the predominantly white northern counties, with blacks accounting for only about 5% of convictions. But black usage has expanded, and now accounts for about 15% of convictions.

Methamphetamine admissions	fall by	64	from	251	to	187
Methamphetamine releases	fall by	9	from	288	to	279
Methamphetamine population	falls by	92	from	7729	to	7637
Meth white population	falls by	85	from	5254	to	5169
Meth non-white population	RISES BY	18	from	2485	to	2503
Percent meth inmates who are non-white	RISES BY	.62 %	from	32.15%	to	32.77%

Non-violent first-incarcerants, by month, Jan-2000 to Apr-2025

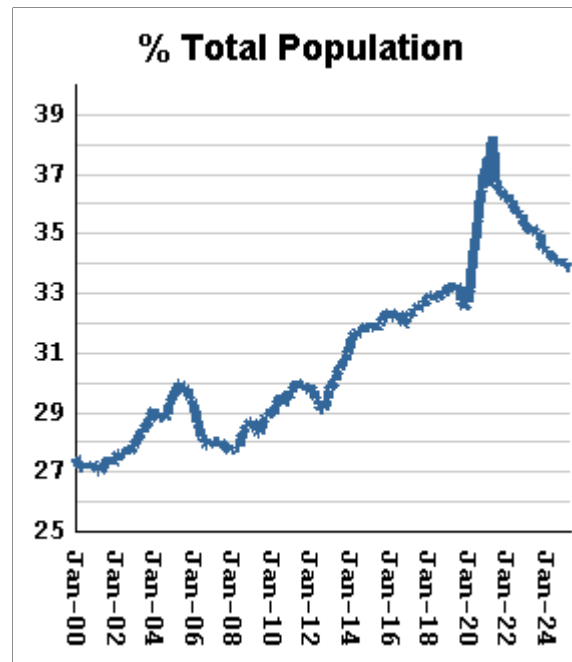

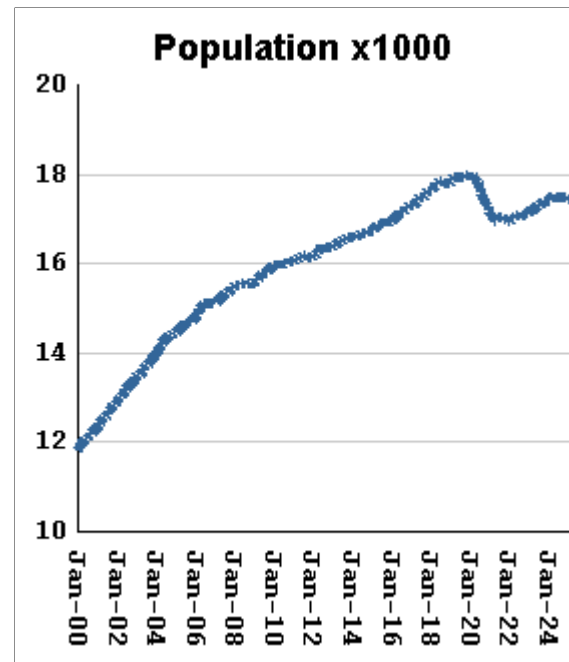

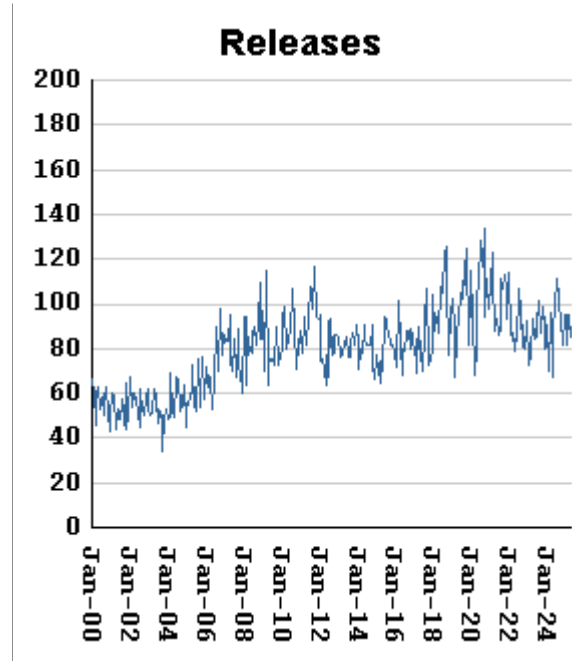

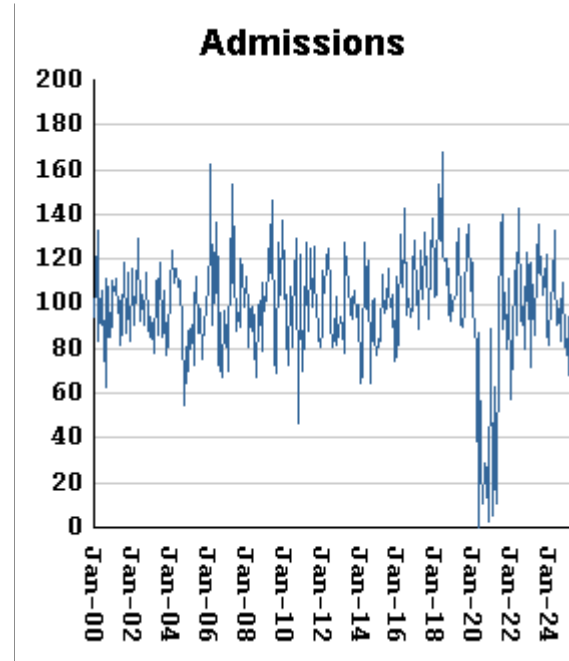

Historically, about one in six Georgia prison inmates has been a first-time incarcerant with a non-violent crime. In 2012 Georgia passed HB1176, which aimed to curb the growth of prison population by steering the least dangerous, least hardened offenders away from prison through pre-trial intervention, diversion, drug courts and treatment programs, and raising the dollar thresholds that define property felonies. The expectation is that over time, these measures will reduce the percentage of first-time non-violent incarcerants in prison.

Non-viol/1st-Incar admissions	fall by	62	from	274	to	212
Non-viol/1st-Incar releases	fall by	19	from	266	to	247
Non-viol/1st-Incar population	falls by	35	from	5629	to	5594
Non-viol/1st-Incar % of total population	falls by	.05 %	from	10.92%	to	10.87%

"Seven Deadly Sins" by month, Jan-2000 to Apr-2025

Tough legislation in 1995 imposed mandatory ten-year minimum terms for kidnapping, armed robbery, rape, aggravated sodomy, aggravated sexual battery, and aggravated child molestation, and a minimum of 25 years for murder. A second conviction resulted in life without parole. As predicted, longer prison terms caused population to climb steeply for about a decade. It then began to level off, as releases started catching up with admissions. The 2008 dip in percentage of total population (bottom right) was caused by the surge of methamphetamine convictions (Page MO-03). Note: these graphs include inmates convicted before 1995.

Overview of inmate age statistics, Jan-2000 to Apr-2025

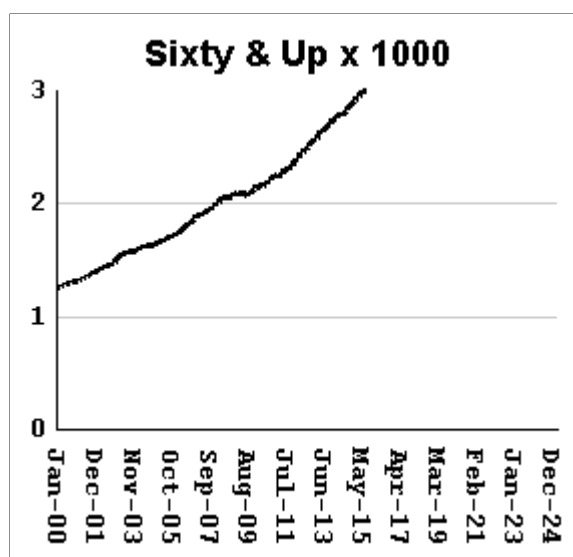

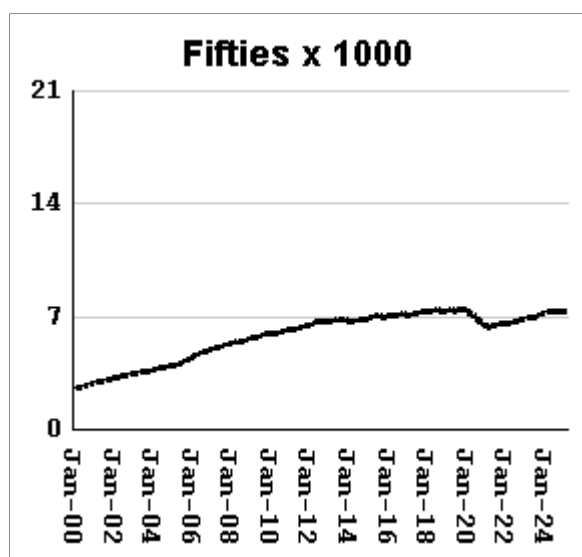

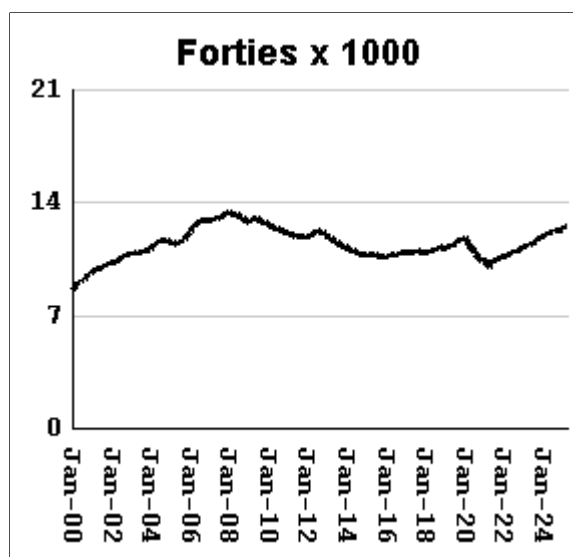

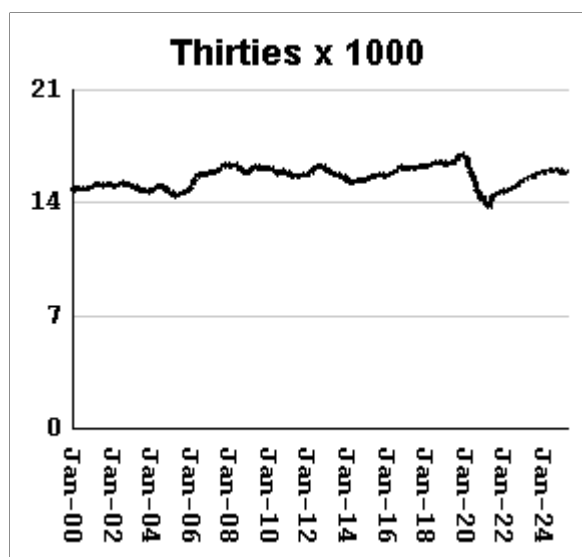

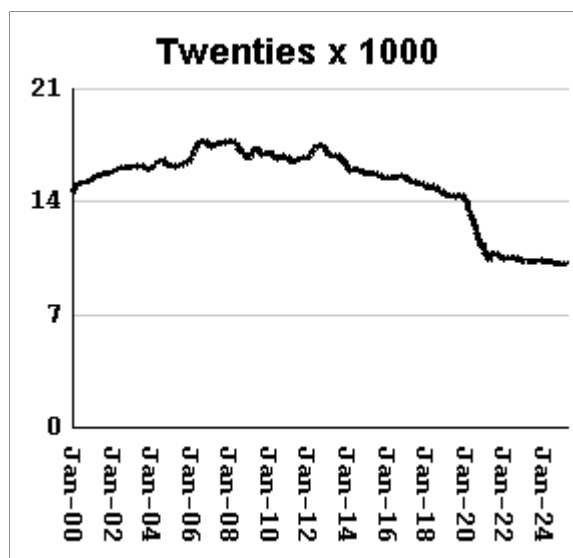

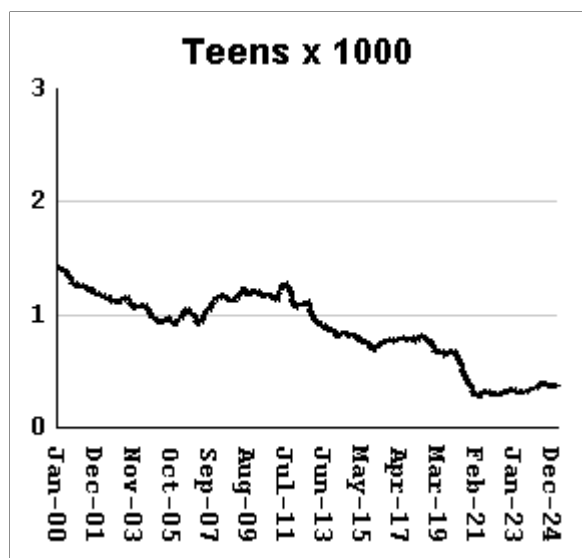

The "aging inmate population" is a concern in correctional systems throughout America, including Georgia. Here, the increase in inmate age is the result of several factors. Teenagers have been steered away from prison by increased usage of probation and other alternatives, at least for their first convictions. And there has been a surge of middle-aged male sex offenders due to the expanding "It's OK to tell" ethos. But most importantly, more severe sentence lengths and release policies have greatly increased the length of time that most offenders -- especially violent ones -- spend in prison, thereby increasing their average age.
