

Friday Report - overview and contents

The pages in The Friday Report are about adult offenders in Georgia's prisons and jails. They contain statistical snapshots and trends in the populations and movements of offenders in the state prison system, on probation, on parole, and in local jails. Information comes from databases of the Georgia Department of Corrections (GDC) and the Board of Pardons and Paroles, and from data provided by local jailers. Information is summarized into tables in the GDC/Parole Data Warehouse, and is extracted into these pages each Friday. Pages are organized according to the table that supplied the data.

The Monthly Research Table , named "MO_RESRCH" or simply "MO", contains data about state prisoners, grouped into statistically interesting categories. The table contains one record per month, from January 2000 to the present. Despite its being "monthly", it is updated weekly, because some data trickles in for several weeks before it becomes stable history.

Releases by clemency and maxout, Jan-2000 to Jun-2025

There are two main ways of being released from a Georgia prison -- by actions of the Board of Pardons and Paroles ("Clemencies") and by service of 100% of the court-ordered sentences ("Maxouts").

"Clemency" includes paroles, reprieves, commutations, and transfer to other confinement prior to expiration of sentence. "Other Releases" includes deaths, and sentences modified or overturned by the courts. Clemencies and maxouts may or may not be followed by periods of probation.

Inmates with meth crimes, by month, Jan-2000 to Jun-2025

Methamphetamine is one of the most addictive drugs ever known. At first it induces intense euphoria, but with continued use causes severe depression and physical deterioration, including the dental catastrophe known as "meth mouth". Georgia's meth epidemic began in the early 2000s and has seen continued growth over the last 2 decades, with continued expansion beyond the originally predominate use by northern county white males.

Non-violent first-incarcerants, by month, Jan-2000 to Jun-2025

Historically, about one in six Georgia prison inmates has been a first-time incarcerant with a non-violent crime. In 2012 Georgia passed HB1176, which aimed to curb the growth of prison population by steering the least dangerous, least hardened offenders away from prison through pre-trial intervention, diversion, drug courts and treatment programs, and raising the dollar thresholds that define property felonies. The expectation is that over time, these measures will reduce the percentage of first-time non-violent incarcerants in prison.

'Seven Deadly Sin', by month, Jan-2000 to Jun-2025

Tough legislation in 1995 imposed mandatory ten-year minimum terms for kidnapping, armed robbery, rape, aggravated sodomy, aggravated sexual battery, and aggravated child molestation, and a minimum of 25 years for murder. A second conviction resulted in life without parole. As predicted, longer prison terms caused population to climb steeply for about a decade. It then began to level off, as releases started catching up with admissions. The 2008 dip in percentage of total population (bottom right) was caused by the surge of methamphetamine convictions (Page MO-03). Note: these graphs include inmates convicted before 1995.

Overview of inmate age statistics, Jan-2000 to Jun-2025

The "aging inmate population" is a concern in correctional systems throughout America, including Georgia. Here, the increase in inmate age is the result of several factors. Teenagers have been steered away from prison by increased usage of probation and other alternatives, at least for their first convictions. And there has been a surge of middle-aged male sex offenders due to the expanding "It's OK to tell" ethos. But most importantly, more severe sentence lengths and release policies have greatly increased the length of time that most offenders -- especially violent ones -- spend in prison, thereby increasing their average age.
